Table of Content

CHAPTER 1 Introduction **01-45**

1.1 Introduction to Artificial Intelligence
1.2 Foundations of Artificial Intelligence
1.3 Historical Evolution of Artificial Intelligence
1.4 State of the Art in Artificial Intelligence
1.5 Intelligent Agents and Their Characteristics
1.6 Agents and Environments
1.7 Rationality and Good Behavior
1.8 The Concept of Rationality in Intelligent Systems
1.9 Nature and Types of Environments
1.10 Structure of Intelligent Agents
1.11 Types of Intelligent Agents
1.12 Applications and Challenges of Artificial Intelligence

CHAPTER 2 Problem-Solving **46-119**

2.1 Introduction to Problem-Solving in Artificial Intelligence
2.2 Problem-Solving Agents and Their Architecture
2.3 Problem Formulation and State-Space Representation
2.4 Example Problems in Artificial Intelligence
2.5 Searching for Solutions
2.6 Uninformed Search Strategies
2.7 Breadth-First Search and Depth-First Search
2.8 Uniform-Cost Search and Iterative Deepening Search
2.9 Informed Search Strategies and Heuristic Search
2.10 Heuristic Functions and Their Properties
2.11 Constraint Satisfaction Problems: Formulation and Representation
2.12 Constraint Propagation and Inference in CSPs
2.13 Backtracking Search and Local Search for CSPs
2.14 Structure of Problems and Problem Decomposition
2.15 Adversarial Search and Game-Playing Agents
2.16 Optimal Decisions in Games
2.17 Minimax Algorithm and Alpha–Beta Pruning

CHAPTER 3 Knowledge & Reasoning **120-198**

3.1 Introduction to Knowledge Representation and Reasoning
3.2 Knowledge Representation Issues and Challenges
3.3 Representation, Mapping, and Knowledge Structures
3.4 Approaches to Knowledge Representation
3.5 Issues in Knowledge Representation
3.6 Predicate Logic and First-Order Logic
3.7 Representing Simple Facts Using Predicate Logic

3.8 Representing Instance and ISA Relationships
3.9 Computable Functions and Predicates
3.10 Logical Inference and Resolution
3.11 Natural Deduction and Logical Proofs
3.12 Rule-Based Knowledge Representation
3.13 Procedural and Declarative Knowledge
3.14 Logic Programming and Its Applications
3.15 Forward Reasoning and Backward Reasoning
3.16 Pattern Matching and Rule Matching
3.17 Control Knowledge and Knowledge-Based Systems

CHAPTER 4 Probabilistic Reasoning **199-265**

4.1 Introduction to Probabilistic Reasoning
4.2 Knowledge Representation in Uncertain Domains
4.3 Probability Theory and Uncertainty Management
4.4 Bayesian Networks: Structure and Representation
4.5 Semantics of Bayesian Networks
4.6 Probabilistic Inference in Bayesian Networks
4.7 Dempster–Shafer Theory of Evidence
4.8 Fuzzy Sets and Fuzzy Logic
4.9 Fuzzy Reasoning and Approximate Inference
4.10 Introduction to Planning in Artificial Intelligence
4.11 Components and Architecture of a Planning System
4.12 Goal Stack Planning
4.13 Hierarchical Planning
4.14 Other Planning Techniques in Artificial Intelligence
4.15 Applications of Probabilistic Reasoning and AI Planning
